

Park Pilot

**Revolutionizing Parking
Management.**

When Parking Becomes a Problem...

Vehicle Pollution

Traffic Congestion

Frustration

Parking Fines

Urban congestion and limited parking information waste time, fuel, and frustrate users while businesses and authorities struggle to manage parking spaces and share data efficiently.

Introducing Park Pilot & Park Pilot Business Applications

Park Pilot

Application is designed to help users find nearby parking stations with ease and efficiency. Users can filter parking spots based on whether they are free or paid and view details such as ratings, prices (for paid parking), and navigate to the selected parking location.

Park Pilot Business

Application is tailored for managing and registering parking spots. It caters to two main user categories:

- 1) **Business User** (managing paid parking)
- 2) **Admin User** (managing government-provided free parking).

Market Analysis and Potential

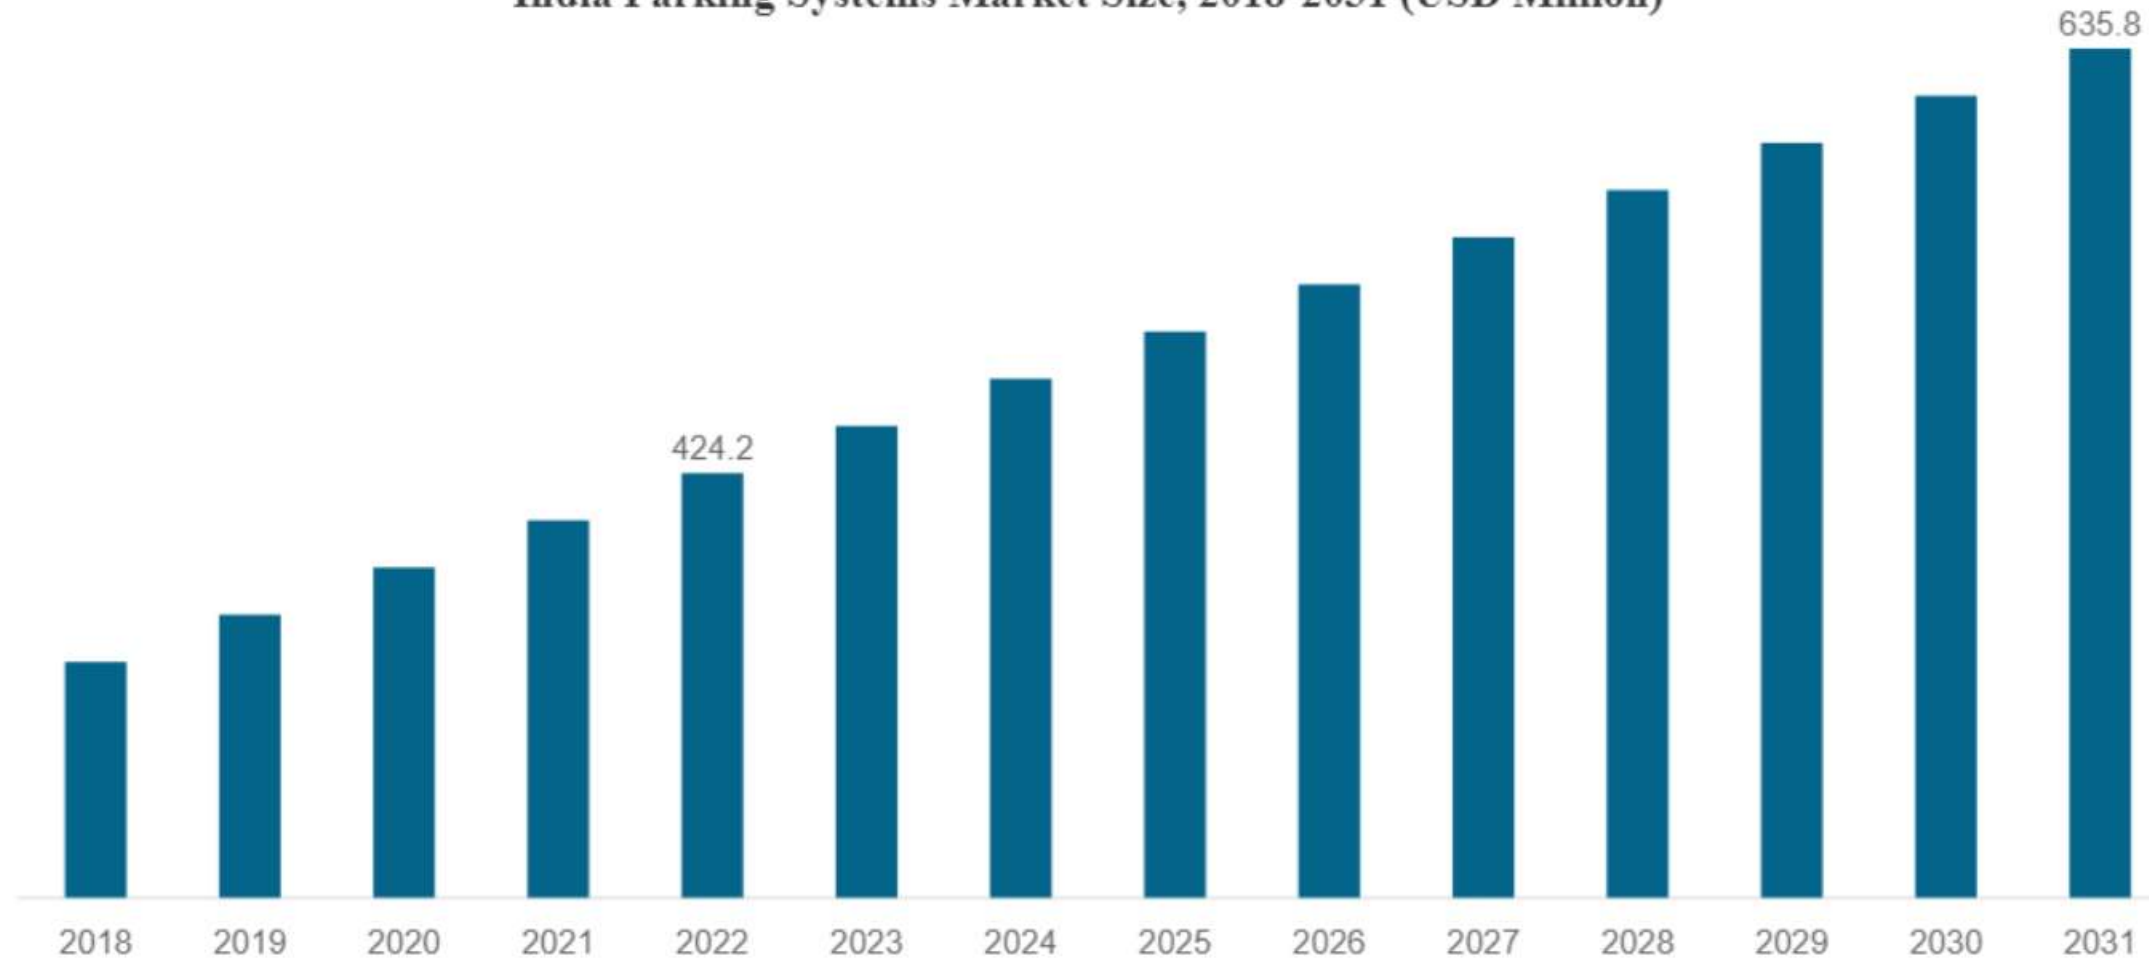

Market Demand

Parking management is a major concern for both car owners and parking lot operators, and Park Pilot provides the perfect solution for these problems.

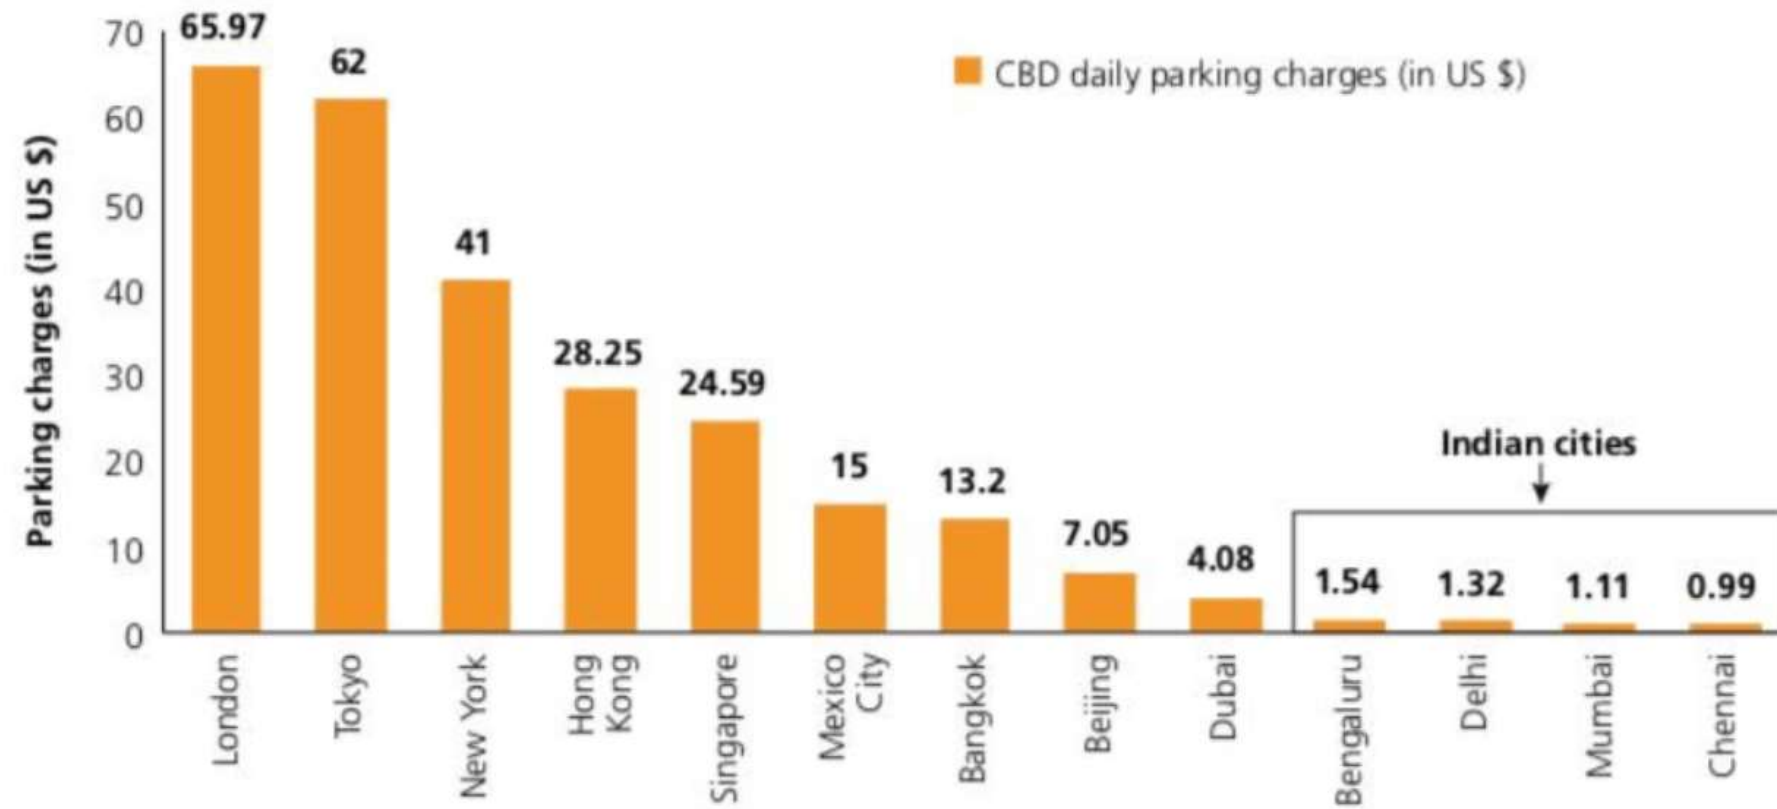

Market Potential

The parking management market is expected to grow rapidly, providing plenty of room for growth.
